

Curriculum: SUCCESSFUL TRADER COURSE

4 Steps Training

1. TECHNICAL ANALYSIS
2. MONEY MANAGEMENT
3. PSYCHOLOGY
4. MENTORING

TO MAKE MONEY FROM TRADING (Stock, Commodity & Currency)

With Ashish Joshi, Professional Trader and Investor

PART ONE

TECHNICAL ANALYSIS (TA)

STOCK MARKET IS NOT CASINO ANALYSE BEFORE YOU TRADE

You will get the meaning of these tools on internet

but you will not get

“How to actually earn from it?

Which tool should be used by whom?

When which tool should be used?

Which time frame you should use?

And Much More...

TA will make you well verse with tools of TA so that will give ability to **frame your own trading strategies.** No need to depend on others system's, black box systems or tips provider. Frame according to your nature and your goals.

15	Basics of Elliot wave Theory	Introduction to Elliot Wave theory

PART TWO

MONEY MANAGEMENT

Technical Analysis will help you do good trades.

But doing Good trades and making money are two different things.

Money Management will make you increase your money by trading.

Technical analysis teaches how to select stocks, when to enter and exit but money management tells you how much qty. to buy, how much capital is required to start trading or investing in stock market, how much return you can expect, etc.

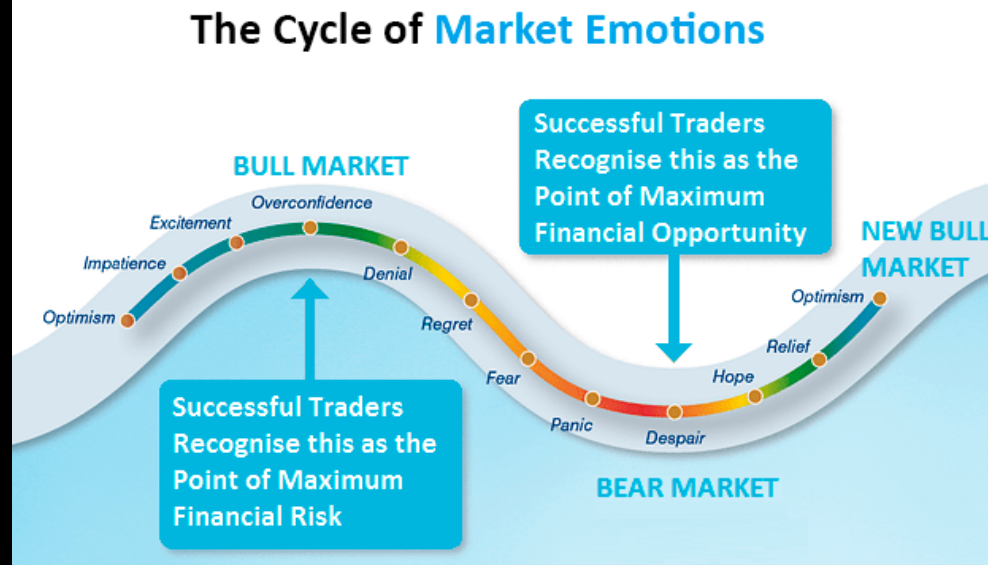

INDEX: MONEY MANAGEMENT

1	What is Money Management & Importance of it	Have you ever experienced that although you have a good trading strategy but your trading account just seems to be losing money? If Yes then you are Probably weak at money Management
2	Risk Management	Position Sizing How many shares to buy? How much money to risk in particular trade? Trailing SL Should I trail SL? If yes then When and Where Portfolio Meltdown Level Max. No of O/S Positions to have a time in Trading Reducing Risk with Diversification Averaging Should Be done or Not Adjusting position size after Drawdowns When to get slow in trading OR Where to put trading break in trading
3	Money Management	How to make huge money from trading even starting small Pyramid Diversification for increasing returns Expectancy What should be Risk: Return? How it affects your trading and overall returns for intraday, short term and long term. A Realistic Look at Trading expenses Leverage Leverage: A Double-Edged sword Should we Leverage? If yes, then How Much Leverage Is Right in investing, short term, intraday, etc. Adjusting position size after Profits Power of compounding for traders Where to put trading break or accelerate trading
4	Money Mgt. Statement	Calculating Trading Capital How much trading capital do we need to achieve Desired Returns? Explained with Calculator. Are You Undercapitalized for Making a Living in Trading? How Much Returns a Trading System Can Generate

PART THREE PSYCHOLOGY

Though you know, how to do good trades (through Technical Analysis)
&
How to Make Money (through Money Management)
But Knowing and doing are two different things.

If you are not able to follow it, everything is useless and Believe me You cannot follow those rules if you are not mentally strong. Mentally weak people for sure will end up with losses.

Just like in Life, in stock Market also, there is a Game between Mind (What you learnt) and Maan (that works on illusions and wishes). You must know well in advance, actually you are taking decisions out of Mind or something else.

Our Mind very Well knows what is written in Bhagwat Geeta but our Maan doesn't allow to do that it in real life and so we are not able to free from the clutches of Life.

Same Way we cannot earn in trading also if we don't Know How Psychology Makes us take Wrong Decisions even after knowing everything.

INDEX: PSYCHOLOGY

1	Why Trading Psychology	Characteristics of Stock Market <i>Case Studies: Tulip, Dotcom, 2008</i> Why People Not able to Earn Trading Psychology the solution
2	How to Protect and Earn: Market Inefficiencies	Technical Analysis is not fool Proof then How to deal with This Uncertain Market. Issues like: Need to Predict market to earn, Full Proof System needed to earn in Stock Market, How to deal with News in trading, etc
3	Strengthening Trader's Psychology: A shield from Madness	Psychology Includes Decision Making Process & Our Attitude 1. Decision Making Process A. Our Nature (Emotional OR Logical) Emotional cycle of human beings B. Our Behavioural Bias Bias make us take illogical decision, these are present in everyone to various degrees. However, we can mitigate those biases by identifying and creating Trading and Investing Rules – but only if we know about these Biases. <i>Explained all bias with examples</i> 2. Our Attitude Attitude of any successful man, human Behavior decides success or failure in Stock Market. Either you have it inborn or you to develop it.

**Lots of E- books will be provided
at the end of the course**

PART FOUR

MENTORING

It is a journey from amateur to successful trader

Just making you aware by teaching once and giving theory will not help
you

Soon you will forget and leave everything.

We will not only help to strengthen out all the aspects of

Technical Analysis, Money Management and Trading Psychology.

But We will even, keep recalling you all rules, motivating you, guiding you,
solving your hurdles, Guidance on doing back testing of your own systems

Gradually it will no longer remain as rules but it will become your nature.

MENTORING

BE YOUR OWN BOSS

This course will be entertaining with Real life case studies, assignments, movie clippings, everything will be taught on Charts and not just theory class.

With the objective to make you great trader.

Invest in Yourself
